Dear Colleague

Re: WeMeReC Maps

The enclosed WeMeReC Map presents clopidogrel prescribing data provided by Health Solution Wales for the year ending November 2005. The map has been produced to support the recommendation of the All Wales Medicines Strategy Group that prescribing of clopidogrel should be audited as part of the prescribing incentive scheme.

This is the second map that has been developed by WeMeReC to highlight prescribing information for Wales. The maps outline prescribing trends in local health boards and focus on specific areas in which improvements in prescribing are desirable.

Maps can also be viewed via our website: www.wemerec.org

If you have any questions or comments, or if you have any requests for maps you would be interested in seeing developed, please don't hesitate to contact us.

Yours sincerely

Mr J.M. Hayes
Director, WeMeReC
